PROSPECTUS

International Urology Conference In celebration of 25th Anniversary of the Sri Lanka Association of Urological Surgeons (SLAUS)

SLAUS UROLOGY WEEK

11th – 15th November 2024

**Cinnamon Life Exhibition & Convention Centre
Colombo, Sri Lanka**

Sri Lanka Association of Urological Surgeons (SLAUS) is celebrating its silver jubilee this year. Established in 1999, SLAUS is the professional body of all urological surgeons spread across the length and breadth of Sri Lanka. The much awaited 25th Anniversary Annual Academic sessions will be rolled out at the brand-new sprawling conference venues of the Cinnamon life in the heart of Colombo from 13th to 15th November 2024. It is the culmination of a week of urology activities styled SLAUS urology week 8-15 Nov 2024, similar to the very successful series of activities like last year.

SLAUS urology week will commence with many workshops and forums facilitating more interactive styled learning specially with the aspiring urology colleagues in the first three days and finish with style with the two day conference towards the week end. As usual the session will be held with the participation of The British Association of Urology Surgeons (BAUS), British Journal of Urology International (BJUI), Urological Association of Asia (UAA), Societe internationale d'Urologie (SIU) and SAARC Association of Urological Surgeons (SAUS) in addition to high powered delegations from eight individual SAARC nations.

World renown experts in the field would be joining in deliberations at orations, plenaries, symposia and free paper sessions. The president and council of SLAUS take pleasure in inviting colleagues and trainees in the ever-evolving field of urology and industry partners established and upcoming to participate and share the knowledge, experience and fellowship at this much awaited 25th anniversary annual celebrations.

WHY PARTICIPATE AT SLAUS 2024

The SLAUS 2024 is Sri Lanka's premier platform dedicated to showcasing pharmaceutical and technological advancements in urology. This year, we anticipate a significant turnout of healthcare professionals from Sri Lanka and neighboring countries. Our longstanding partners include renowned leaders in urology who have leveraged this exposure to enhance their market presence. This event offers a prime opportunity for both established companies and innovative startups to present their products and cutting-edge medical technologies to a wide audience. The exhibition area, known as the 'Science and Technology Hall,' has been uniquely designed to maximize visibility for our industry partners, replicating the successful layout from last years.

Various sponsorship options are available to boost your exposure among a dedicated urology-focused audience.
